name Christophe Foyer

date 23-07-2019

subject Recommendation letter

To whom it may concern,

Christophe Foyer worked at Temporary Works Design (TWD) from 26-11-2018 until 5-7-2019. TWD is specialized in creating custom-designed tools and structures that allow contractors to perform large and complex installation projects safely and on time. We generally work in offshore wind, offshore oil and gas, civil, salvage and decommissioning sector.

Christophe has worked in the function of Design Engineer at TWD. In his function of Design Engineer, Christophe assisted in the design of steel tools and constructions for our clients. The tasks he performed involved structural analysis using hand calculations and FEM software, and drafting of the designs in 3D and 2D using CAD tools like AutoCAD and Inventor.

Apart from his duties as a Design Engineer, Christophe was responsible for automating several repetitive engineering and drafting tasks using Python scripts.

We got to know Christophe as a smart and pleasant colleague with good understanding of structures and mechanics. He took responsibility for his tasks and delivered work of good quality.

The contract of Christophe is ended on his own initiative. Should you have any questions, please feel free to contact me at the above address.

With kind regards,

Jan de Klerk
Engineering Manager
